PROFILE

Experienced fullstack developer specialising in TypeScript, Node.js, and React for high-value web applications. Equally comfortable leading collaborative teams as working as a self-directed solo developer. Consistently delivering quality solutions on time and under budget.

PROFESSIONAL EXPERIENCE

Freelance Fullstack Developer

2026 - Present | München, DE

Partnering with clients to build, fix, and ship fullstack TypeScript applications. Everything from initial architecture through to deployment and handover.

Founder, MatterHive

2024 - Present | München, DE

Founded, built, and launched an online platform for lawyers to conduct pre-contract enquiries for conveyancing transactions in the UK and ZA.

Built with Typescript, NestJS, NextJS, Docker, postgres, turborepo, terraform, OpenFGA, RabbitMQ.

Fullstack Developer, Acrontum GmbH

2021 - 2025 | München, DE

Worked on projects ranging from internal POCs to a full product build for a large automotive client. Progressed to tech lead, working directly with the client and supplier stakeholders to design and build their solutions.

Cross-functional teams with developers, designers, QA, DevOps, and PMs. Primarily built microservices and modular monoliths using Node.js, Angular, PostgreSQL, Docker, and AWS.

Senior Consulting Engineer, Keyence UK

2015 - 2020 | Liverpool, UK

Working with sales engineers and their clients to solve advanced technical factory automation problems. Writing software to implement solutions interfacing with varied hardware.

Building and launching various products

I've been concepting, building, and launched various full stack websites and products either solo or in collaboration with other developers with a variety of tools and languages for 9 years.

These include a AI powered TTS journal, an online video training platform with aws based video upload encoding and streaming, a tender marketplace for UK Machine Builders, a stripe based recurring payment platform for service providers, and a fun inspirational holiday flight aggregator and destination research tool.

EDUCATION

Mechanical Engineering - BEng, University of Liverpool
2015
Liverpool, UK
